

Company Profile

FRANKI is a Belgian construction company specialized in civil engineering, industrial buildings, environmental projects, tunnel constructions, office & apartment buildings and renovation works.

The professional knowledge and the experience of staff and manpower guarantees an adequate and efficient execution of these construction works.

This **dynamic** and **qualitative** approach is highly appreciated by the clients of **FRANKI**.

The know-how that **FRANKI** accumulated in the past decades is applied in new fields such as the construction of power stations and incineration plants.

Difficult and complex concrete works are executed to the utmost satisfaction of the clients.

The objectives of **FRANKI** are **quality, respect for the cost of the construction contract and respect for the time schedule of execution.**
